

19 December 2022 **Thiess secures a further A\$480 million of new work at two South Kalimantan mines**

Thiess has received contract extensions at the Wahana mine owned by Bayan Resources and the Hanoman mine owned by Bumi Resources, in South Kalimantan, Indonesia.

With a combined value of A\$480 million over more than three years, Thiess will extend its mining services, including drill and blast, load and haul, and pit dewatering.

Thiess Executive Chair & CEO, Michael Wright said: “We are excited to continue to deliver sustainable mining outcomes for our longstanding partners Bayan and Bumi Resources/CLS, by working with them on the two adjacent mines.

“These extensions reinforce our capability and credentials for operational excellence. They also give us opportunities to showcase our passionate commitment towards diversity and inclusion, where we continue to increase the participation of women and people with disability in our workforce.”

Thiess President Director, Indonesia, Jeffrey Kounang said: “The solutions we provide for both clients enable our team to maximise resource recoveries and optimise the reserves of both operations. We are proud to continuously live up to our clients’ expectations and deliver on our promises.

“We are also very pleased to be able to continue working with the Satui community, which started back in the early 2000s, to help create lasting social and economic values.”
